

Auditing a website structure to maximize and sustain future growth

The Toronto Regional Real Estate Board serves the REALTOR® professionals of the GTA, connecting people and property in their communities.

Problem

- The Toronto Regional Real Estate Board (TRREB) had multiple unconnected web properties that made it impossible to track members across different sites, obscuring the complete engagement picture.
- Driving traffic to public REALTOR® websites was a critical member service, but the absence of data hindered TRREB’s ability to deliver value and insights to members.

Recommended new structure

Recommended – New Structure

ANALYTICS ACCOUNTS	PROPERTIES & APPS	VIEWS	UPDATE
Toronto Real Estate Board xxx	Toronto Real Estate Board (UA-xxxxxx)	All Traffic	Y

	Collab TREB Stage [HISTORIC]	• Leaving for historical access	Y

Approach

Halmyre conducted a Marketing ROI Audit, resulting in the alignment of TRREB’s various independent accounts within one Google Analytics (GA) account. To do this, Halmyre:

- Recommended and supported the implementation of a new, streamlined GA account structure and the use of Google Tag Manager;
- Identified and set up key performance indicators, event goals (such as clicks, time on page, usage, and user pathways), and user experience reporting; and
- Implemented search engine optimization improvements, site performance dashboards, and urchin tracking module codes to track and manage performance.

Outcome

- Efficient tracking and management of traffic across multiple domains.
- An end-to-end view of member engagement across platforms.
- Improved in-house website revision capabilities and more efficient reporting, saving time and money.
- Dramatically improved ability to gain essential business insights through website reporting.
- Ability to identify, prioritize, and address the top issues causing site visitor engagement drop-off.

Goal-tracking dashboards

Established goals and events

PROPERTIES	URL	OBJECTIVES	GOALS	KPIs	EVENTS
communications		Content Website	Engagement Goals	<ul style="list-style-type: none"> • Visiting the Spotlight landing page and selecting a services/tools • Opening a headline • Watching a video in the video centre • Registering for a course by accessing the PD calendar • Clicking on landing page banner 	<ul style="list-style-type: none"> • User types in a search query (top right) • 'See more' buttons on home page • Click on telephone # link • Contact us page • Social media button clicks • Engagement duration • Engagement pages viewed
